Listing of the claims:

Claim 1 (currently amended): A control device for remotely controlling a controlled device, connected to a network, comprising:

<u>a</u> display means for displaying <u>unit which displays</u> a control panel of said <u>the</u> controlled device; and

<u>a sending means for sending communication unit which sends</u> operation information representing a shifting history of a cursor displayed on <u>said</u> the control panel to <u>said</u> the controlled device.

Claim 2 (currently amended): A control device according to claim 1, wherein . . . said the control device is a television and said the controlled device is a video cassette recorder.

Claim 3 (currently amended): A control device according to claim 1, wherein said the control device is a television and said the controlled device is a digital photo-album device.

Claim 4 (currently amended): A control device according to claim 1, wherein said network is the communication unit communicates with the controlled device via a serial bus based on conformed to IEEE 1394-1995 standard.

Claim 5 (currently amended): A controlled device controlled remotely by a control device, connected to a network, comprising:

<u>a sending means for sending communication unit which sends</u> a control panel of <u>said the</u> controlled device to <u>said the</u> control device, <u>and receives operation information</u> <u>representing a shifting history of a cursor displayed on the control panel from the control device</u>; and Reply to Office Communication dated December 7, 2006

a receiving means for receiving operation information representing a shifting history of a cursor displayed on said control panel; and

<u>a</u> control means for controlling unit which controls a function corresponding to the operation information.

Claim 6 (currently amended): A controlled device according to claim 5, wherein said the control device is a television and said the controlled device is a video eassette recorder.

Claim 7 (currently amended): A controlled device according to claim 5, wherein said the control device is a television and said the controlled device is a digital photoalbum device.

Claim 8 (currently amended): A controlled device according to claim 5, wherein said network is the communication unit communicates with the control device via a serial bus based on conformed to IEEE 1394-1995 standard.

Claim 9 (currently amended): A control device according to claim 2, wherein said network is the communication unit communicates with the controlled device via a serial bus based on conformed to IEEE 1394-1995 standard.

Claim 10 (currently amended): A control device according to claim 3, wherein said network is the communication unit communicates with the controlled device via a serial bus based on conformed to IEEE 1394-1995 standard.

Claim 11 (currently amended): A controlled device according to claim 6, wherein said network is the communication unit communicates with the control device via a serial bus based on conformed to IEEE 1394-1995 standard.

Docket No. 1232-4798

Appl. No. 10/021,523

Paper dated: December 22, 2006

Reply to Office Communication dated December 7, 2006

Claim 12 (currently amended): A controlled device according to claim 7, wherein said network is the communication unit communicates with the control device via a serial bus based on conformed to IEEE 1394-1995 standard.
